

INTERNATIONAL
CONFERENCE ON

Physics at the Magnetospheric Boundary

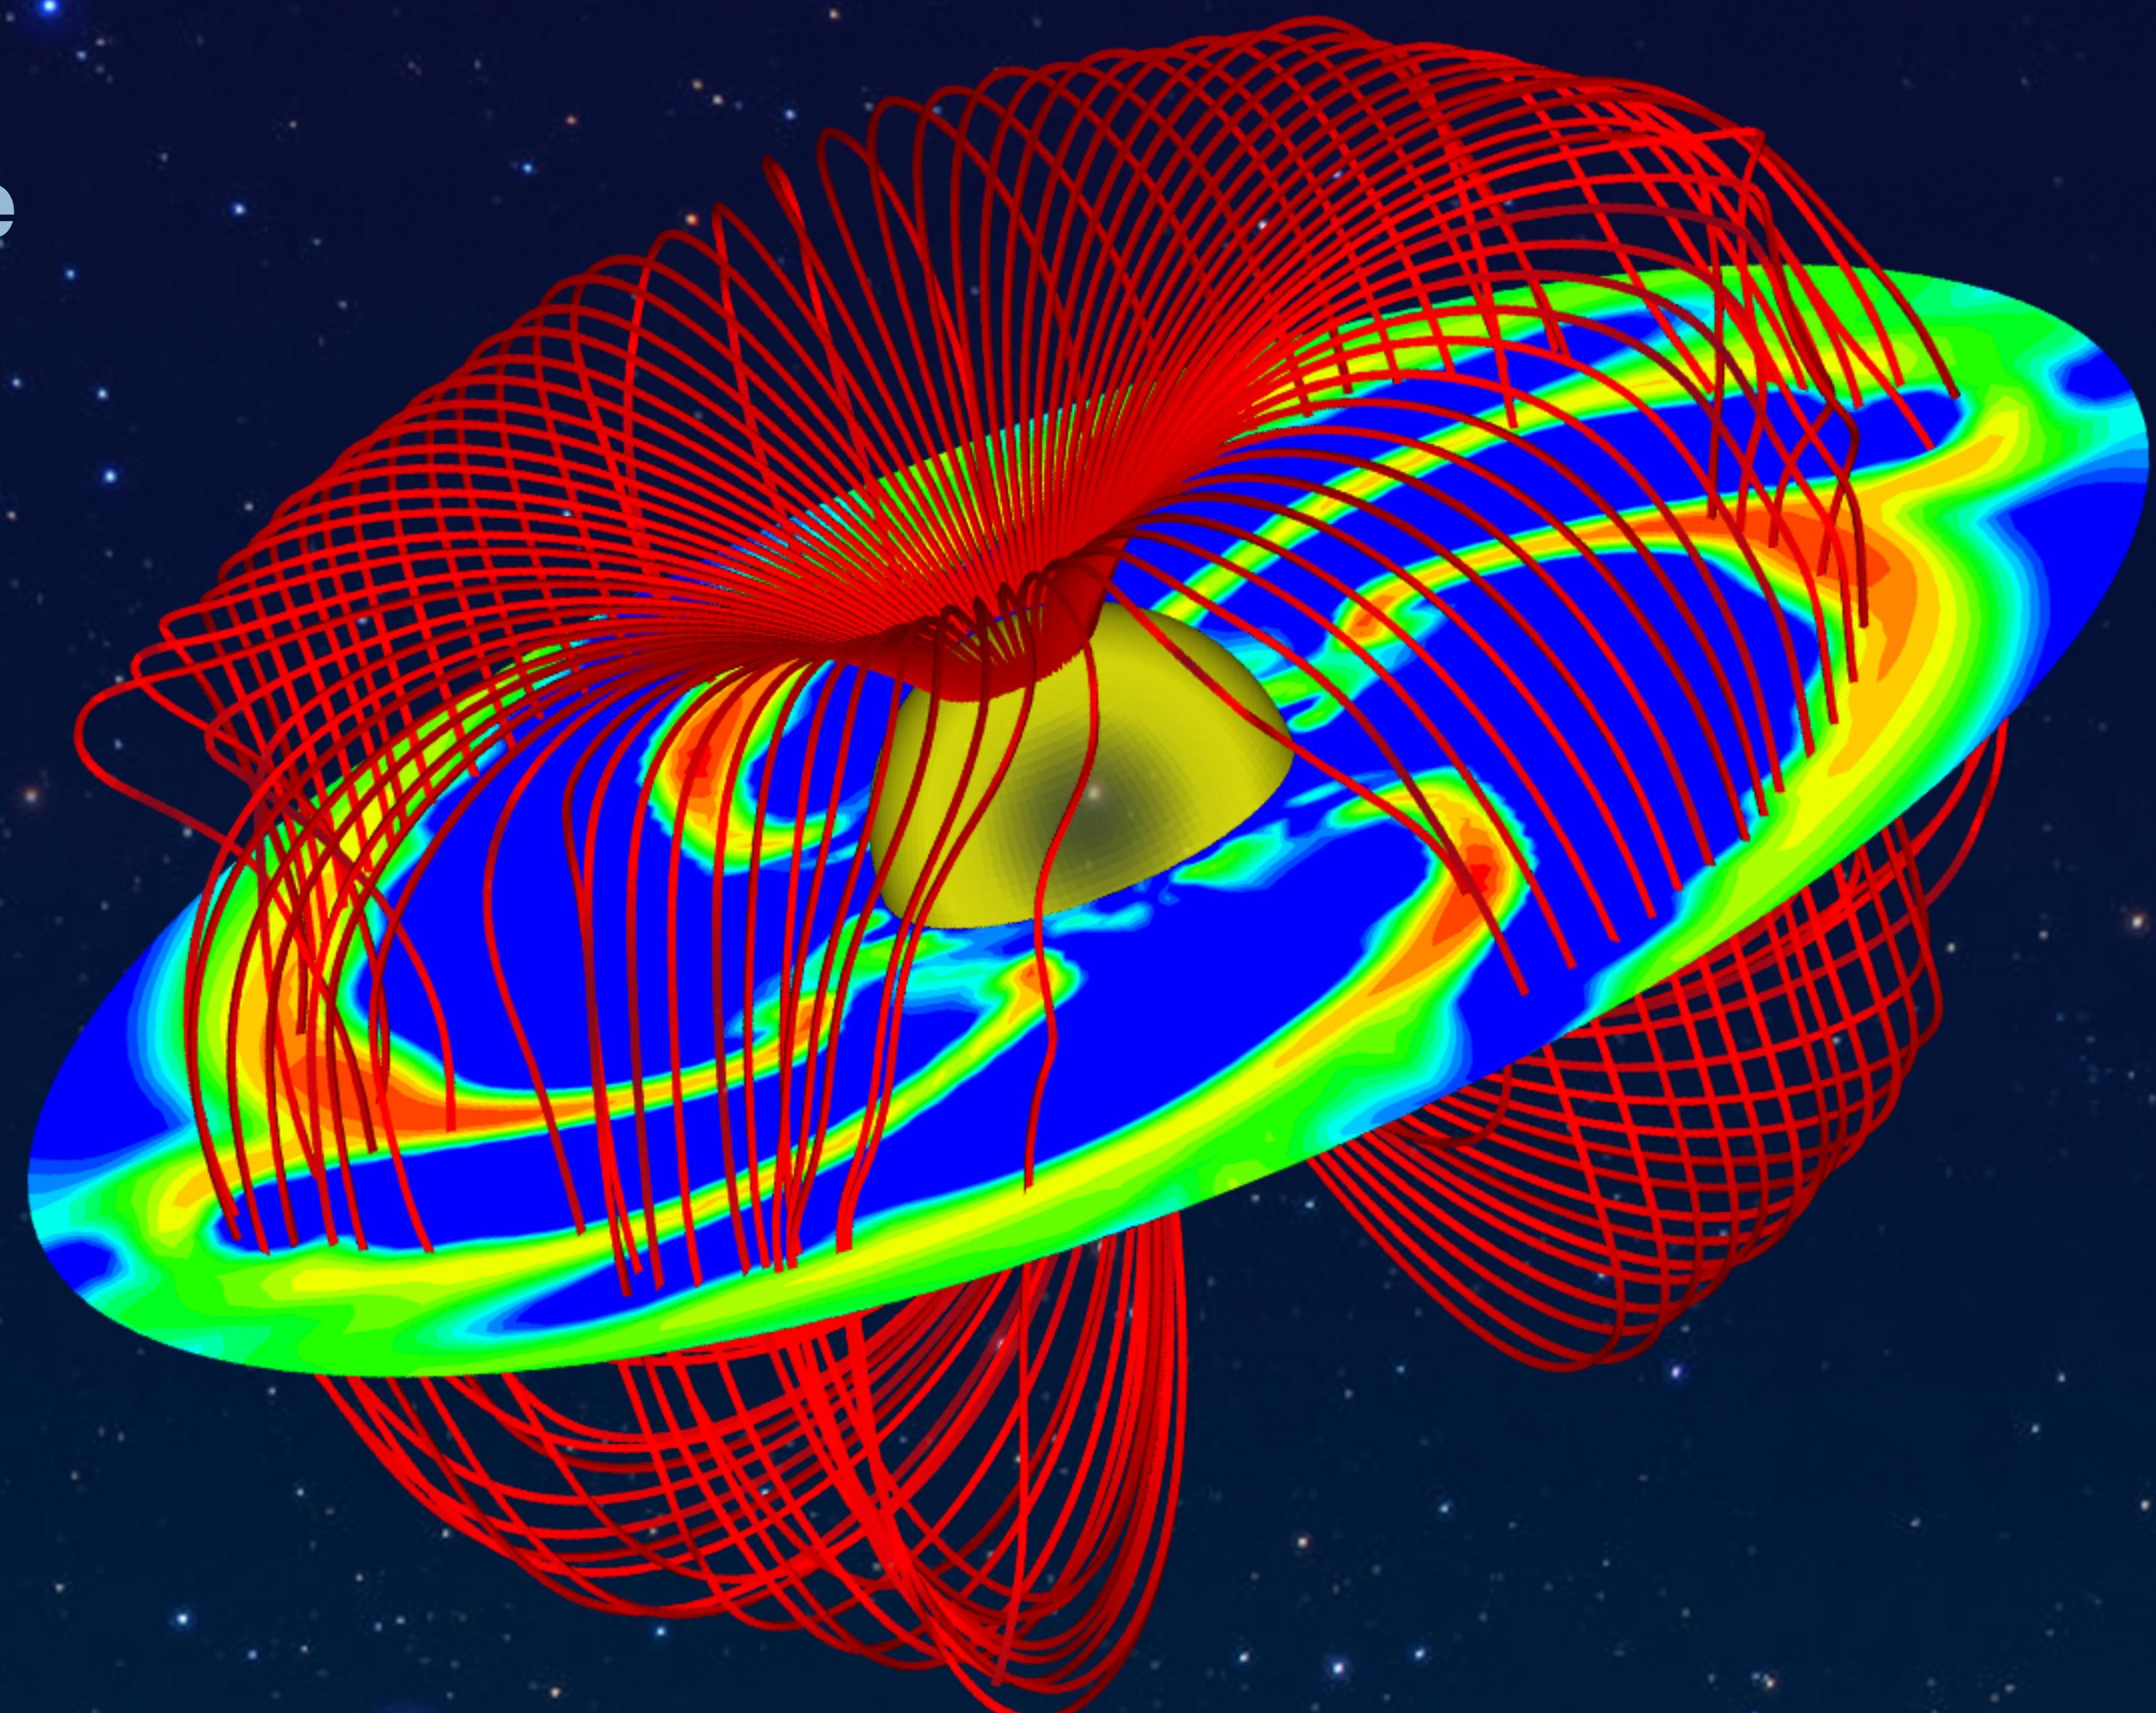

25 - 28 June 2013, Geneva, Switzerland

GOALS:

Exchange results and insights on processes at the boundary of magnetic region around accreting neutron stars, white dwarfs, and T Tauri stars.

PLANNED SESSIONS:

- Theory of accretion onto magnetized stars
- Numerical modelling of plasma-field interaction: accretion and jets production
- Observational clues to the physics at the magnetosphere
- Future perspectives in theory and observations
